“ Basic Installation Guidelines of System Components”

Presented by Sarah Russell

Wednesday, February 17th
5:00pm to 7:00pm

Overview Of Meeting:

This class will discuss application considerations for purchasing and installing electrified hardware to make sure it is correct for your job. This condensed version of Basic Electricity of system components will be led by Ingersoll Rand’s Sarah Russell. This class will be highlighting the use of mag locks, switch controls, power supplies, and electric strikes. Sarah Russell brings with her not only excellent field experience and knowledge, but also 12 years of industry experience. She is also a National Instructor for the Door and Hardware Institute of which she has taught numerous classes regarding Basic Electrified hardware. Sarah Russell is also a CIL.
